A Prognostication.

in Aries, Leo, and Sagittarius.

The lemon is the vertue digested, is named, because it digested, or altereth the nourishment into a true forme. If it be too weak, to do the office, it is best strengthened when the Spoon is in Gemini, Libra and Aquarius.

The third is the vertue retentive, and is called so, because it keepeth in the good nourishment, untill the digestiue vertue hath duely digested and changed it. It is chiefly holpen, the Moon being in Taurus, Virgo, and Capricorne.

The fourth is called the vertue expulsive, be-
cause his office is to expell and put out those in-
feriours excrementes whiche remaine when
the other vertues haue done their offices duly.
He is best retained the Moore being in Can-
cer, Scorpius and Pisces.

A Prognostication.

Buckminster. 1595

which are ready to oppresse nations
there be present sickness by the means
of the danger of sickness to come : they
are best to be emptied out of the belly
ther by letting of blood, purging, sweating,
sweating, or such like evacuation, by
time I will not prosecute.

The disposition of the weather in this quarter of the year, is lyke to be very variable and inconstant: for as there are lyke to be many hot and dry dayes, shewing a great continuance of continuance: so on the contrary there are often shewes tempered with the same, and sundry dayes clappes of shower and lightning, making the weather uncertayne, with clouds, tempests, perils, heats, and moystnes.

The sickness lies to be in the belly, and
fevers of long continuance, fluxes, the belly
the falling sickness, rotten cough, thym
relieves, the heat aches, phlegms, the impo
stomach in the loaves and spleen, the
Gastric, pains in the neck and throat, with
dysentery, both noxious and dangerous.

Buckminster. 1591.

A Prognostication.

Declares what is to be expected in the particular judgments of the gods of the monethes, concerning this first quarter, &c.

The temperance of this quarter is like to bring many sicknesses, and sundry diseases, as to all sorts of folk, as in old, as namely Agues of all sorts, Stitches, gripings, the Collicke, Scurvie, the Beggar, and ache in the Head and shoulders, Plurisie, small Pockes, Ulcers in the Palm, Hoistens, Rheume, Catarrhes, Coughes, hartnes in fetching the breath, Strangurie, and such others, paynfull to beare, and not easie to cure.

Of the Spring time.

The Spring season has beginning at the vernal equinox, entering into the first min. of the signe of Aries, which shall be on Thursday the first of March, at 11. of the clocke and 20. min. in the after noone, making the day & night to be of the length through the whole world.

The winter of the yeere is naturally hot and more temperately, and is therefore reckoned the most wholesome time in the yeere, and it is now the best time to remove sicknesses, and griseles gotten

Buckminster. 1591.

Of the Eclipses of this yeere of our Lord. 1591.

As touching the Eclipses in this yeere, which are three in number; that is to say, one of the Sunne happening the 7. day of July, at two of the clocke and 22. min. in the after noone, being darkened but one point, which is a very small thing, and of no great signification.

And the seconde (which is the first of the yeere) is the 22. day of July, at 11. of the clocke in the after noone also, and under the signe of Cancer, being yet darkened. 20. min. and a halfe, &c.

And the thirde, which is the seconde of the yeere, is the 22. day of December at three of the clocke, and 22. min. in the morning, in the signe Cancer, & will be darkened. 22. min. and more in the bill house of the Westons.

Of these I say, in respect that one shall not be seene of us at all, and another very little, and the thirde, though it shall be manifestly seene, yet the effects thereof shall not take place.

C. iii.

A Prognostication.

and. xxiij. dayes, very seasonable. The. xxv. and. xxvi. dayes, somewhat wyndy and overcast, yet holdyng by.

The last quarter on Saturday, the. xxvii. day, at. vi. of the clocke, and. xxv. min. in the evening, some small frost toward. The. xxviii. day, somewhat lowyng & thicke cloudes. The. xxix. and. xxx. dayes, cold ayre, and overcast wea. her for snow & thicke rayne.

Of December.

The. i. and. ii. dayes, darke & thicke ayre, as it would snow. The. iii. and. iiii. dayes, wyndy and foule.

A Prognostication.

moone, some moysture threathed. The .xxix. and
.xxx. Dayes, fayre for the tyme.

Of May.

The first and seconde dayes, colde ayre, and
variable cloudes. The .iii. and. iiii. dayes,
lowyng and close weather. The .v. day,
Cone small rayne.

The last quarter on Thursday, the .vi. day,
at .v. of the clocke and .xliii. min. in the mornynge,
fresh weather, the wynde North west. The .vii.
and. viii. dayes, colde & moyst weather. The .ix.
and. x. dayes, very temperate. The .xi. day,
much lyke the two former.

The new Moone on Wednesday, the .xii.
day, at .vii. of the clocke, and .xxix. min. in the eve-
nyng, wynd & rayne. The .xiii. and. xiiii. dayes,
variable. The .xv. and. xvi. dayes, cloudy and
moyst weather. The .xvii. xviii. and. xix. dayes,
gloomy weather, with some shewers.

The first quarter on Thursday, the .xx. day,
at one of the clocke, and .lii. min. in the mornynge,
wyndy & cloudy, westerly wyndes threathynge
rayne. The .xxi. & .xxii. dayes, rayne. The .xxiii.
and

Buckminster. 1591.

Of September.

The. i. and. ii. dayes, temperate and low-
ryng. The. iii. and. iiii. dayes, rayne and
wynde. The. v. and. vi. dayes, variable
and lyke to thunder.

The new Moone on Tuesday, the. vii. day,
at. v. of the clocke in the after noone, some what
freshe, but dry, the wynde towards the north.
The. viii. and. ix. dayes, wyndy, with some she-
wers. The. x. day, saye. The. xi. and. xii. dayes,
unsettled weather. The. xiii. and. xiiii. dayes,
wyndy and waueryng.

The first quarter on Wednesday, the. xv.
day, at. ix. of the clocke in the nyght, myllyng
rayne and wynd. The. xvi. xvii. and. xviii. dayes,
boysterous & lowryng weather. The. xix. xx.
and. xxi. dayes, more mylke then the former.

The full Moone on Wednesday, the. xxii.
day, at. ix. of the clocke, and. xi. min. in the nyght,
temperate weather, the wynde easte. The
xxiii. and. xxiiii. dayes, some raine falle. And af-
ter it is wyndy. The. xxv. xvi. and. xxi. dayes
cloudy close, with rayne and cold. The. xxviii.
day, cold ayre toward evening.
